What Are Your Needs?

From kayaks to coolers, furniture and more, we've done it all. As one of the largest rotomolders in the U.S., we've grown by meeting or exceeding our customers' expectations for more than 50 years.

What We Excel in:

High-Volume Runs

As one of the largest rotational molders in the U.S., we excel in high-volume production runs.

Large or Complex Products

Ability to produce custom products with complex geometries and tight tolerances up to 500 lbs. and up to 17 ft. long.

Turnkey Manufacturing

We are truly a one-stop shop. From engineering support and production to assembly and drop shipping.

Dependable Delivery

Ability to ship your products quickly to you or drop ship to your customer – from single-unit shipment to truckloads.

Complex Materials

Extensive experience in Polyethylene, Flexible & Rigid PVC, Flexible & Rigid Foam, and Crosslinked, Engineered, Specialty & Flame-Retardant Resins.

Full-Service Project Management

Providing fully comprehensive project management including design assistance, production management and quality assurance from start to finish.

Dutchland Gives Your Company the Ability to Go BIG.

Why Dutchland?

There are plenty of rotomolders that can make parts. What sets us apart is our team approach, our dedication to excellence and exceeding our customers' expectations.

What Sets Us Apart:

Dedicated Account Management

We're here when you need us, providing accurate information and updates on your projects.

Value Added Services

We offer warehousing and distribution, drop shipping, mold maintenance, engineering support and much more.

Continuous Improvement

Facilities have the latest equipment, technology, systems and processes available to support all projects.

Automation

Robotic and CNC trimming to ensure the accuracy, consistency and finish of your products.

Ability to Scale Quickly

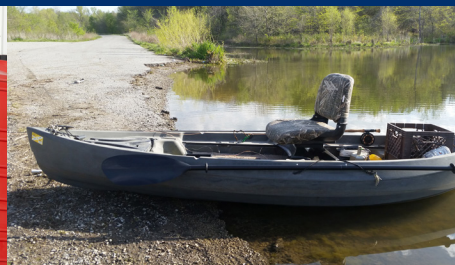

From full-scale production lines to limited runs, Dutchland Plastics can quickly adjust to meet your needs.

State of the Art Facilities

Over 200,000 sq. ft. of manufacturing and warehousing space in Wisconsin and Central New York.
