

MORE THAN JUST A ROTOMOLDING COMPANY

At Dutchland, we believe molding is only one part of the process. That's why we have built up a lengthy list of value-added services that make us a truly customizable one-stop shop.

ENGINEERING

Our knowledgeable engineering team provides design assistance, project and production management and product review services to ensure your products meet or exceed expectations from start to finish.

QUALITY SUPPORT

Our quality assurance team is second to none, able to clearly identify and document customer requirements and continuous improvement opportunities.

MOLD MAINTENANCE

Dutchland provides in-house preventative maintenance and tool repair to ensure your molds are always production ready and running efficiently.

ROBOTIC CUTTING & ROUTING

Dutchland uses the latest technologies to ensure the accuracy, consistency and finish of your products.

FOAM FILLING

Dutchland has a dedicated and experienced foam department, offering both rigid (insulation and structural) and flexible (cushion) foaming.

ASSEMBLY

Some manufacturers stop when the parts are done, we don't. Dutchland offers complete assembly and packaging customized to your needs.

WAREHOUSING & DISTRIBUTION

With nearly 200,000 sq. ft. of manufacturing & warehousing space, Dutchland can fulfill all of your product storage and distribution needs.

DROP SHIPPING

We have the ability to ship your products directly to the customer – from single-unit shipment to large retail shipments.
